

Hello

Today, I have a few requests to comment on to you. Our valuable Hiliana requires your help to correct the serial number that was renewed and now comes with a different number of the 42100004, SUBSECTION 183. She will send you the pertinent details of the case and is waiting for your response.

On the other hand, Marlene Noemi Martin Plascencia, our exemplary executive of Autos Seguros OVM, has informed us about an error in the issuance of the details of the contracting party in the GY41001701 policy. In response to this, she has decided to cancel the aforementioned policy. We ask for your intervention to correct this matter.

In addition, our dedicated partner, Anahis Flores de SeguroInteligente.mx, needs your support. He has noticed a dramatic increase in the renewal of the EK38008712 policy and fears that customers will reject it if we do not lower the price. Anahís is looking to lower the price further, in addition to the 50% discount already applied. You'd probably agree that a 974% increase is a bit puzzling. Attached is the quote generated for you to take a look at.

I look forward to your support and timely response to these matters.

Best regards

María José Hernández Ramos
