

Hello

I am writing based on several requests that have accumulated.

First, Denis Reyes, Administrative Manager of Dynamic Risk Alternatives, has asked for the cancellation of the F942004159 policy. This is based on the fact that a vehicle, namely the 'Dolly', has been sold. As a result, we expect an adjustment in the amount to be paid for Express Cayro. In addition to the decommissioning of this vehicle, we must take into account the change from a tractor-trailer to RBCC.

In addition, it has come to my attention that Francisco Méndez has pointed out an error in a detail of the plan. Apparently, the first digit of the policy should be 9BFB, not 8BFB. Francisco, we need your help to verify this change. To make the process easier for you, find the images attached in this email.

I look forward to your comments on these matters and thank you in advance for your prompt response. As always, I'm available if you have any questions or need more details.

Best regards,
