Good day,

I kindly ask you to validate and make the necessary adjustments to the invoice for the N143006860 policy, which currently shows a gene-rich RFC (RFC DRI130709G38). I request that the homoclave be added to this page before our insured proceeds with the payment.

Likewise, it is necessary to cancel the I2 42000218 line belonging to Octavio Daniel Villavicencio Arreola, because he does not maintain ownership of the insured unit. I hope you will be able to manage this process as soon as possible and I look forward to your comments on it.

In addition, I would like to inform you about a recent conversation with Fabian Rocha, CoE Supervisor in Lockton Mexico. The issuance of an invoice-value insurance policy from 7 September 2022 has been discussed. Fabian has stated that he will confirm whether the client chooses to issue with the quote that has been provided to him.

Please take into account these necessary changes and requests that I have mentioned. I look forward to your support in carrying out these efforts.

Best regards.
